Restaurants
Food trucks
Coffee shops
Bars

Residential

Whole home protection
Including furniture and rugs
Apartment & Condominium
Common areas

Everyday protection for high touch surfaces.

Can be applied to a variety of surfaces to deliver lasting protection against a wide range of bacteria, fungus and algae.

For use in high traffic public areas as well as private and residential settings. Effective on indoor and outdoor surfaces including plastic, stone, metal, fabric and carpet/rugs, even high traffic, high touch surfaces.

High touch surfaces include:

| | | |
|--------------------------|----------------------|-------------------|
| Elevators & Escalators | Door handles & knobs | Fitness equipment |
| Floors | Gaming equipment | Handrails |
| Indoor/outdoor play sets | Sport equipment | Keyboards |
| Kiosks/Exhibits | School/work desks | Wall switches |
| Toilets/sinks/showers. | Passenger seating | Exam tables |

Anywhere protection against bacteria, fungus and algae is needed.

Easy application for small areas and large industrial spaces.

MonoFoil can be applied using trigger sprayers, pump-up or pressurized sprayers. Reapplication is highly recommended for high contact surfaces.

The frequency of application is dependent on the surface being treated and the volume of contact.

Apply after normal dusting and dirt removal cleaning.
Cleaning products will not remove the microbiostatic barrier.

MonoFoil D: EPA Registered disinfectant, effective for one week

MonoFoil M: EPA Registered microbiostatic long-acting coating, effective for 3 months.
